

Hyperactive curation

PLAY path to share

SHARE documentation

Obtain authorization. Populate project website. Record of protocol. Build questionnaires. Create annotation manuals. Share documentation on & preregister analyses and/or hypotheses

PLAN to share in repo

Train on & protocol. Set up volumes from template

COLLECT raw data

Recruitment data

Collect demographics & metadata

Home data

Collect & questionnaires

CURATE & format data

Generate metadata formats

Generate file names in

SHARE raw data

Create session folder. Enter demographics & metadata

Upload to session folder. Submit to server

ASSESS data quality, process data, run analyses

Quality assurance on home data

Check metadata & labeling on session with script. Generate identifier from metadata with app. Create CSVs from with script

Review for protocol adherence. Complete outcome summary checklist. Fix errors in

SHARE processed data

Mark QA outcome & upload processed files to

ANNOTATE & augment data

Annotation & transcription

Generate template & link on with app

Interobserver reliability

Retrieve annotated file from with app

Perform annotation & document annotation metadata in

Perform reliability annotation & document annotation metadata in

ASSESS annotation quality, process data, run analyses

Check typos in annotation format & metadata with script. Fix file

Check typos in annotation format & metadata with script. Fix file. Assess interobserver reliability with script. Record outcome in file

SHARE secondary data & analyses

Upload annotated file to

Combine files for annotation with app. Upload files to

PREPARE publication with links to repo

Select excerpts of behavioral codes & findings. Include DOI & links to excerpts in manuscript

SHARE volume

Mark volume as openly shared
